04:15-05:00 pm **Marcel Tanner** (former head of Swiss TPH)

05:00 pm **Networking apéro with the speakers**

Workshops DBM Career Day

Read me:

1. Registration is via the links to OLAT in this document. Regular unibas login is required.
2. Choose a maximum of two workshops you wish to attend.
3. Make sure you don't book different workshops in the same time slot (every workshop is offered twice, from 9.00-10.30 and from 11.00-12.30).
4. If a particular group is full you can still book the workshop but you will be added to a waiting list. If someone drops out the first person from the waiting list automatically is transferred to the group.
5. The CV-Check may be booked in addition to the two workshops. Students close to finishing their PhD are prioritized.

Time Management – Sina Henrichs, Graduate Center

Title: Becoming Your Own Time Manager

Abstract: Are you always late on time? Are you often do things in the last minute? Do you run from deadline to deadline? This short workshop is particular designed to reflect common time management techniques, to reconcile your everyday tasks and how to set up and improve your self-management. It will help to set priorities and define your goals. Further, the training will help to identify massive time consumers and shows tricks how to deal with disturbances. By the end of the workshop you should have started to become your own time manager and develop a first draft of your master plan.

Max number of people: 15

[Link to group 1 \(9.00-10.30\)](#), [Link to group 2 \(11.00-12.30\)](#)

Publications – Silke Bellanger, Nicolas Sartori, University Library, UB

Title: Publishing and disseminating your research

Abstract: The workshop addresses the different possibilities of publishing your research and making it visible, findable and citable. We would like to discuss with you: Publication strategies in the digital era, Open access publishing from preprint servers to peer reviewed journals: threat or chance for your career? Costs and legal aspects of publishing? Distinguish your works and enhance their visibility using researcher IDs such as ORCID. What to consider when using academic social networks for your research – Academia.edu, ResearchGate, Mendeley and other options. Assessing your research impact: Is it all about Impact Factor?

Max number of people: 15

Needs to know in advance: Are you publishing at the moment? Where? What kind of paper?

[Link to group 1 \(9.00-10.30\)](#), [Link to group 2 \(11.00-12.30\)](#)

Presentation – Janina Linnik, Oskari Vinko

Title: Talking science -- hands-on workshop on communicating difficult science clearly and effectively

Abstract: Misunderstandings on scientific topics are ubiquitous, especially among non-scientists and the media -- and this can have serious consequences. Many contemporary problems (e.g. in health and environment) require an interdisciplinary research team, which poses additional communication

challenges for scientists. Unfortunately, science communication is usually not part of the curriculum. This interactive workshop aims to fill the gap: we use hands-on exercises and feedback from both peers and lecturers to teach communication techniques -- learn about the most common pitfalls when talking to non-experts, how to structure a talk and how to engage the audience.

Max number of people: 15

Prepare a short (2 minute) talk in advance, e.g. about your thesis topic!

[Link to group 1 \(9.00-10.30\)](#), [Link to group 2 \(11.00-12.30\)](#)

Job Interview – Birgit Müller, Career Service Center

Title: Preparing a job interview

Abstract: There is only one chance to make a first impression...

... and it should be a good one. Do you know what is important during job interviews? How to prepare yourself as best you can? This workshop will help you understand the employer's perspective. You will also practice your answers to some common job interview questions and will be coached.

Max number of people: 30

[Link to group 1 \(9.00-10.30\)](#), [Link to group 2 \(11.00-12.30\)](#)

CV-Check – Birgit Müller, Career Service Center

Important: [Send us](#) your CV until 15.11.2017. Please mention what kind of job are you applying for (it should be an industry position, not academia).

Max number of people: 12

13.30-17.00, each person gets 15 minutes, time slots will be assigned by the PhD-Club, please email us if you have any strict preference.
