

Focal Area of Research in Oncology

Christian Frezza

Professor of Metabolomics in Ageing at CECAD,
University of Cologne

“The role of Fumarate Hydratase in cancer”

By using a combination of biochemistry, metabolomics, and systems biology, Christian investigates the role of altered metabolism in cancer initiation and progression. He aims to exploit these findings to establish novel therapeutic strategies and diagnostic tools for cancer.

Tuesday March 25 at 12:15

Seminar room - ZLF, Hebelstrasse 20, 4031 Basel
